Cilebut, Bogor

I am a Software Engineer with experience in developing web-based systems and digital products. I specialize in Laravel, React.js, Node.js, and MySQL, with a strong background in building backend systems, RESTful APIs, and responsive user interfaces. I also have experience in UI/UX design using Figma and leading development teams on academic and commercial projects, focusing on scalable, secure, and user-centered solutions.

EDUCATION

GUNADARMA UNIVERSITY 2021 - 2025
Informatics

SMA NEGERI 1 SUKARAJA 2019 - 2021
Ilmu Pengetahuan Alam

WORK EXPERIENCE

NARADATA ID December 2025 - Present
Software Engineer

- Developed and maintained web applications using Laravel and MySQL.
- Built backend systems and RESTful APIs to support business processes and integrations.
- Collaborated with UI/UX, QA, and stakeholders to deliver scalable solutions.
- Optimized performance, security, and code quality through testing and refactoring.
- Monitored, debugged, and maintained application stability in production.

PETRIKOR May 2022 – December 2025
Web Development

- Developed and maintained company websites using React.js, Laravel.
- Collaborated with UI/UX designers to implement responsive and user-friendly designs.
- Regulates everything that happens in the Petrikor Web.

Video Editor

- Responsible For Making Video Documentation.
- Video editing for Petrikor Events, Make 2 videos in a month.

PT. KINEMA SYSTRANS MULTIMEDIA - INFINITE LEARNING INDONESIA February 2024 - June 2024

UI/UX Designer & Web Developer

- Designed UI/UX using Figma, including wireframes, prototypes, and design systems.
- Developed responsive web applications using React.js, Node.js, and MySQL.
- Improved usability, performance, and user experience through iterative testing and optimization.

PROJECT EXPERIENCE

Memly | Collaborative Event Photo Platform

Mei 2026 - Present

Founder | Fullstack Developer

- Architected and developed a collaborative event photo platform enabling organizers and guests to share memories instantly through QR Code-based event access.
- Engineered scalable RESTful APIs and cloud-based media storage with Laravel, Next.js, TypeScript, and AWS S3 for secure image management and high-performance delivery.
- Built core product features including event creation, QR Code invitations, automatic photo uploads, gallery management, selective downloads, and role-based administration.
- Led end-to-end product development, defining system architecture, optimizing frontend performance, and delivering a premium user experience inspired by modern SaaS applications.

PT Perkebunan Nusantara | Incident Management Platform

Maret 2026 - Present

Mobile Developer

- Architected and developed SIAGA Mobile, an enterprise incident reporting and management application for PT Perkebunan Nusantara, streamlining real-time incident logging and approval workflows across multi-tiered organizational roles.
- Engineered a dynamic SLA tracking engine, implementing automated 14-hour compliance calculations, real-time status history tracking, and visual threshold alerts for operational compliance monitoring.
- Built core product features, including role-based decision workflows (approval/rejection with mandatory audit notes), multi-asset incident reporting, offline draft auto-save synchronization, media evidence management, and interactive location picking.
- Optimized mobile architecture and API integration, utilizing Flutter with Clean Architecture, GetX reactive state management, custom HTTP interceptors for automatic authentication token refreshes, and local data persistence for zero data loss.

GROOTS | Innovation Competition & Incubator Platform

Juni 2026 - Present

Lead Developer | Fullstack Developer

- Architected and developed a nationwide AI-powered innovation competition and incubation platform supporting Participants, Juries, Admins, and Super Admins.
- Designed and implemented scalable RESTful APIs with Laravel 13, PHP 8.3, and role-based access control (RBAC), ensuring secure authentication and private document management.
- Built responsive web applications using Next.js, React, and TypeScript, delivering interactive dashboards, networking maps, and optimized user experiences.
- Led fullstack development by establishing code quality standards, optimizing API performance, and integrating complex business workflows including VOD learning, weighted scoring, and real-time leaderboards.

Universitas Adhyaksa | Website Campus System

December 2025 - Present

Lead Developer | Fullstack Developer

- Developed and maintained the campus information system website to support academic and administrative processes.
- Led the development team, overseeing task distribution, code quality, and implementation progress.
- Built and integrated fullstack features, including backend logic, APIs, and database management.
- Collaborated with UI/UX designers and stakeholders to deliver responsive and user-friendly interfaces.

VAMERATALE | Website E-Commerce
Project Manager | Fullstack Developer

February 2024 - June 2024

- Developed and maintained the company's e-commerce website using React.js and Node.js.
- Led the team through project planning, development, and implementation phases.
- Collaborated with UI/UX designers to deliver responsive and user-friendly interfaces.

SKILLS & LANGUAGE

HARD SKILLS

- Javascript, php, React.js, Laravel, Next.js, Golang, Flutter, MySQL
- Trello, Notion, Jira, Miro
- Adobe Photoshop Canva, Adobe Premiere Pro, Canva, Filmora

SOFT SKILLS

- Communication, Analytical Skills
- Leadership, Problem Solving
- Time Management, Collaboration
